SENSOTRONIC™

An advanced scanning eye examines the level of soil in the wash water and automatically deletes a secondary fresh-water fill if not needed, saving you water, time and money while cutting energy usage by 20%. An industry exclusive, **SENSOTRONIC**² adds a second sensor that checks and adjusts the water temperature and length of your wash cycle for optimal results every time.

ENERGY STAR® QUALIFIED AND NSF CERTIFIED

Proving once again that Bosch is committed to efficiency, all of our dishwashers are ENERGY STAR® qualified. They also boast NSF Certification for 9 out of 12 wash cycles, ensuring your dishes are 99.99% bacteria free at the end of each cycle.

FLOW-THROUGH WATER HEATER™

In traditional heating elements, water falls randomly onto a coil, which warms it inefficiently and creates a hazard. By passing it through a heating chamber instead, Bosch allows the water to reach temperatures of up to 161°F safely and quickly. This means you can place plastic items in the bottom rack without fear of melting or damage.

CONDENSATION DRYING

Unlike other drying systems that use unclean air from the kitchen's back wall, Bosch uses the residual heat from the warm water inside its tub. A sanitizing temperature of 161°F leaves residual heat in the tub, creating condensation along the cooler wall. The condensation is then drained so you'll never have to release steam into the kitchen.

ALL BOSCH DISHWASHERS INCLUDE THE FOLLOWING FEATURES:

- Stainless Steel TallTub™
- Two-Pump Motor System
- Suspension Motor
- Triple Filtration System
- Flow-Through Water Heater™
- 4-Level Wash
- Condensation Drying
- Extra Tall Item Sprinkler
- Nylon Coated Racks
- NSF Certified Cycles
- Electronic Controls
- ENERGY STAR® Qualified
